

Delivering high quality care requires planning, skill, flexibility & good communication between everyone involved.

In a service industry which has always been fast moving, managing change is an everyday challenge.

The introduction of new legislation in the form of the Personalisation Agenda & the move toward self directed budgets offers even more challenge to both the care industry and the software solutions which have revolutionised how care is planned & managed in the past few years.

HET Software has been at the forefront of delivering quality solutions to the care industry & we are continuing that innovative approach through the launch of an exciting new product, **caremanagemobile**

As the impact of the personalisation agenda unfolds it is clear that delivering outcome led care services in a flexible & responsive manner will require a significant improvement in communicating with care staff .

**caremanagemobile** delivers the means to ensure that providers can easily & effectively link changes to service user requirements from their CareManager3 management system directly to their care staff in the field.

**caremanagemobile**

'Our Passion for Success  
is tempered by  
the Diligence to  
Deliver'

## HOW DOES IT WORK?

When a carer arrives at a service users location, whether it be home, day centre or just a shopping visit the device automatically identifies the correct location via GPS tracking and allows confirmation of both visit and tasks.

### FEATURES INCLUDED

- ELECTRONIC VISIT CONFIRMATION
- VISIT & TASK AMENDMENT
- GPS LOCATION & MAPPING
- SHIFT & TIMESHEET CONFIRMATION
- MESSAGING
- LONE WORKER ALERTING

## leaving the competition behind

### REDUCING COSTS

**caremanagemobile** will revolutionise the way you manage & deliver care, by eliminating unnecessary paperwork such as timesheets, mileage claim forms, schedule lists & significantly reduces administration costs.

### PROOF OF CARE

The system tracks and manages every amendment to the care planned vs delivered & provides online evidence to support your invoicing.

### RESPONSIVE TO CHANGE

Enabling rapid changes to care schedules allowing you to respond quickly & flexibly to new demands & make best use of your most important resource – your staff.

### LONE WORKER SUPPORT

Care staff can be supported through GPS location tracking and if needed a discreet panic alert links directly to managers to ensure a response.

### IMPROVING SERVICE DELIVERY

Improving communication between the office and care staff will speed up the way you manage the changes which occur every day in the care industry.
